Originally Published: July 10, 2018 Duet Game strategist guide: Dodge obstacles faster and through all levels with these tips and tricks! Duet Game is a game type of strategy that requires you to navigate through all kinds of obstacles by circling and circling in unison. Change direction and avoid all blocks and compartments standing between you and the next checkpoint. Run to something and the stage begins. Whether you're just starting out with Duet or trying to figure out how to get past a very hard stage, follow it together for our top tips and tricks! 1. Stay in the middle when you can. In many stages Duet there are objects that only pass you by. Usually moving around puts you in harm a way so it's better to stay where you are and let the dangers of passing you properly. 2. Memorize patterns, they do not change each small segment, or stage, in Duet Games remain the same no matter how many times you play. So unlike games like Smash Hit where levels keep changing every time you have to start it, you can always count on Duet's Game segment to stay the same. This makes it easy to memorize patterns, mainly because segments are usually very short. 3. Remember what taps each side is easy to get your fingers mixed and mean to move one way but move the other. Your red and blue ship is set to move clockwise and clockwise. The easiest way to remember is that if you tap on the right, you will move forward in time on the clock. Taping left and backwards will move your vessel in response clockwise. 4. The gauge moves carefully when passing the rotating bar on the Spinning Block, the type of rectangle of the length, can be very to evaluate. I usually wait until I really have to move so I know what direction I have to go in and how far. The sooner you start transferring more space for an error there. I sometimes use lighter pipes to move around the rotating bar because it gives me more control and allows me to change direction in a pinch. 5. Continuous rotating is not tricks on repeated obstacles If you find large stacks of obstacles that are aligned the same distance apart and all of the same size, try only hold on the screen to rotate around them. Almost 99% of the moment works and much easier than trying to pass them go slower or change direction. That's usually how you hang on them. 6. The back and forth do tricks In some instances of constant back and 10th movements makes you pass more obstacles than you think. The key is to know when these principles apply. Search for objects that are not necessarily the same size but have the same distance between them. These are the segments you want to use the back method and up. 7. It's all about time usually how you tap the screen always following the pattern so watch it. If it helps, calculate it in your head. If you look at a bunch of obstacles that come to you at once, they may be aligned in a way that creates some kind of tapping pattern. Get to know him and learn it. This goes along with 2 tips about memorizing. 8. Do not overdo it on the rotating block. It is very easy to block the wrong time spinner. You pass the first part but then his back end spins back and you hit it. This is due to spin too far. The best way to prevent this from happening is with a little backtrack before you see the right edge of the spinner block leaving the screen. 9. Watch your splatters The best way to learn from your mistakes is to pay attention to where you have the most problems. The great thing about Duet Games is that you can see physically where you are having trouble. If you see a lot of splatters in certain parts of the segment, concentrate on getting by those obstacles first. Once you can, concentrate on the next section. This usually leads to a faster segment of explanation while learning a pattern for future segments at the same time. 10. Duet is more suitable on iPad if you have an iPad, try Duet Games on a larger screen. I've found I'm a distance judge and better direction of change because I can see better objects without my thumb sometimes on the way. Whenever I can take my iPad instead of my iPhone to play, I do. And I always ended up getting further. Your tips and tricks? If you've played duet games on your iPhone or iPad, what tips and tricks do you find useful to level of explanation?
